AND ACCESORIES

History

For more than 40 years our company has been standing for the manufacture of the best quality nets in the market, at the most competitive price possible. This philosophy, which guided all our efforts, we have dedicated our lives to become what we are today:

EL LEON DE ORO is a brand represented in more than 60 countries, with 2 delegations in **Great Britain** and the **United Arab Emirates**, with the most modern machinery and technology in the market of nets & ropes. In addition, we have an internal laboratory for scientific research and innovation, and a staff of almost 100 professionals.

For all this, we would like to thank all our customers for the high level of demand and for their loyalty, as well as our partners in the European Committee for Standardization and external laboratories and, of course, our competitors, help us to be stronger and more creative every day.

Nowadays, the second generation of the founding family, represented by General Director, **Alfredo Sánchez**, takes the reins of the company, adapting it to respond to the new challenges of the market, and to protect its core values, such as supreme quality of the products and immediate customer service, which allows us to continue growing and celebrating success together.

Antonio Benimeli
Founder/Charmain

**We would like
to thank all our
customers for
the high level of
demand and for
their loyalty**

Alfredo Sánchez
General Manager

R&D: INNOVATION AS ATTITUDE

*In the 21st century nobody doubts the beneficial work of scientific research, the fact of its importance in different businesses. **We believe in progress** and we want to be part of the change in the field of netting manufacturing.*

Internal research

At our own laboratory with modern equipment we check the raw material and final product by chemical, static, dynamic and aging test to ensure their highest quality, so the nets have the appropriate strength and mesh size. Each production is controlled by R & D department directed by personnel with specific training in textile materials. We are in constant research for the development of new products that allow us to be at the forefront of the market.

External research

With the support of the University of Alicante, we carry out scientific studies on different types of nets that can possibly help to make decisions in European Standardization Committees and support the initiatives of clients in the elaboration of new products.

An aerial photograph of an industrial area. In the foreground, there are several large, light-colored industrial buildings with corrugated metal roofs. One building has a sign that reads "HAWAIIAN ISLAND FISH PROCESSING" and "TEL: 808-551-2233". To the right of this building, there are palm trees and a parking lot with a few cars. In the background, there are more industrial buildings, some greenery, and a body of water under a hazy sky.

5 reasons for choosing us

Guarantee

We are a financially stable company maintaining Quality Management System which fulfills the requirements of the following standard ISO 9001:2015. Also, having the certificates like IQNET, AENOR, EUROTTEST, GS, we are always supervised by external international auditors.

Best value

At our own laboratory with modern equipment we check the raw material and final product by chemical, static, dynamic and aging test to ensure its highest quality, so the nets have the appropriate strength and mesh size. Each production is controlled by R & D department directed by personnel with specific training in textile materials.

Flexibility of production & customization

We can produce the nets of any size, color, form. Production experience transmitted from generation to generation that allows to make the most difficult netting projects. We can personalize the nets using custom label with your logo or advertisement on the same net or PVC band.

Fast service

We are differentiating from the others by lingual flexibility and by wishing to find solutions which will help save time and money to our partners. Our delivery time varies seasonally, but for special requests we have FAST-TRACK service that can be helpful in urgent situations.

Comfortable packaging & marketing support

We take care of every detail for having all products nicely packed for a more comfortable experience of the end customer. We are also actively improving online and offline marketing tools that help our customers to be different.

WHY HIGH TENACITY POLYPROPYLENE (PPhT)?

HIGH RESISTANCE

To UV rays, cold/hot.

To acids.

It can't damage our PPhT except boiled Xylene.

To dirt.

Our polypropylene doesn't react with cement, paint or other substances.

To water.

PPhT doesn't absorb it and has less density so it floats. In fact, PPhT doesn't conduct electricity.

ENVIRONMENT

PPhT is 100% recyclable and eco-friendly.

Anti-allergic with OEKO-TEX certificate.

Without microorganisms because PPhT blocks the light that form bacteria and microbes.

CUSTOM MADE

Several colours, sizes and shapes.

WHY KNOTLESS TECHNOLOGY?

ALWAYS SAME MESH SIZE

All knotted netting must be treated in heat autoclave for mesh stabilization, so they remain fixed. And if it's not done properly, it can cause different mesh sizes within the same net.

This is impossible for knotless meshes which are fixed forever.

SPACE SAVING

Knotless nets take less space and are easier to pack. Therefore, this feature helps to save money while transporting.

LIGHT WEIGHT

Knotless nets are lighter than knotted. It is also an important value when transporting and mounting large nets.

HARMLESS IN CASE OF FALL

Knotless nets are harmless in case of catching peoples. This feature could be different with knotted nets when people can have dangerous scratches and burns.

Guarantee of quality

CERTIFICATES OF EXCELLENCE OF THE COMPANY

CERTIFICATE AENOR ER0167/2001 and **CERTIFICATE IQNet** confirm that our management system complies with the current international standard ISO 9001. We are a reliable partner that has a management system under external control.

CERTIFICATE OF ORIGIN demonstrates that 100% of our products are manufactured in Spain.

QUALITY CERTIFICATES

OEKO-TEX CERTIFICATE confirms that all our polypropylene nets meet all international environmental standards and restrictions on hazardous substances (according to REACH regulation). The fiber has been assigned Product Class 1 (items for babies and infants), which is the most restrictive in its scale.

AITEX FIRE REACTION CERTIFICATE confirms the highest class "M1" to our flame-retardant polypropylene fiber.

B1 CERTIFICATE OF FIRE REACTION confirms the compliance with DIN 4102-1.

CERTIFICATE UKAS OF FIRE REACTION confirms that flame retardant nylon nets meet the requirements of NFPA 701.

CERTIFICATES OF CONFORMITY OF THE PRODUCTS

CERTIFICATES AENOR, EUROTTEST, GS confirm that safety nets comply with EN-1263-1.

CONFORMITY CERTIFICATE confirm that our safety nets are tested to meet or exceed ANSI A10.11.

CE CERTIFICATE confirms compliance with the EN-1891 standard of a Type A Semi-static rope.

DECLARATION OF CONFORMITY signed by the Director General.

CERTIFICATE RITT SPORT LOISIRS confirms compliance with the French standard NF S 52-106, which regulates the production of ski-protection nets: a) for rigid posts (S1); b) for flexible posts (S2).

DEKRA CERTIFICATE confirms the conformity and quality of container nets.

Football nets

**Our football
nets are used
for the main
international
football
competitions.**

**FOOTBALL
WORLD CUP:**

South Africa (2010)
Brazil (2014)
Russia (2018)

**FOOTBALL
CONFEDERATIONS
CUPS:**

South Africa (2009)
Brazil (2013)
Russia (2017)

ASIAN CUP
in Australia (2015)
AMERICA CUP
in Chile (2015)
EURO
in France (2016)

**“The quality of our nets
regarding durability and
resistance is internationally
recognized.”**

El Leon de Oro produces high quality football nets in a large variety of both regular and custom sizes upon request. Meeting all the requirements of the EN 748, our finest UV treated Polypropylene football goal nettings are demanded for the top football clubs around the world and are present on the most important competitions.

The strength and durability of our football goal nets is well recognised. Our cleverly designed knotless football nets are made of high tenacity, UV stabilised and rot-proof polypropylene. All our full size football goal nets are available in both solid and multiple colour options to fit all styles of football goal posts. Our football nets can match most team colours.

Our football netting meets all the requirements of the **EN 748 standard:**

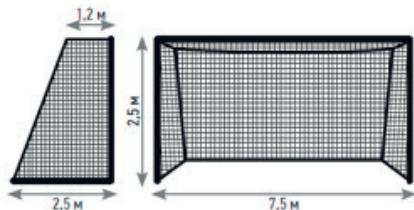

- Mesh size is not more than 120mm.
- Thickness diameter is more than 2 mm.
- Have a tension rope along the back for a better fixation of the net.

All our full size handball nets are available both solid and multiple colour and mesh options.

El Leon de Oro produces high quality handball nets in a large variety of both regular and custom sizes upon request. Made of the finest UV treated Polypropylene, our handball goal nettings meet the requirements of the EN 749 standard and are requested for the most important competitions. All our full size handball nets are available both solid and multiple colour and mesh options to fit all styles of handball / futsal goal posts.

Our handball goal nets offer the following advantages:

- A high strength mesh and energy absorption capability.
- The lightweight design and soft structure of the nets make them easier to assemble.
- Precise mesh size because of the way the joins in the mesh interlock.
- Very little abrasion/high resistance to chafing.

Our handball/futsal nets meets all the requirements of the DIN EN 749 standard:

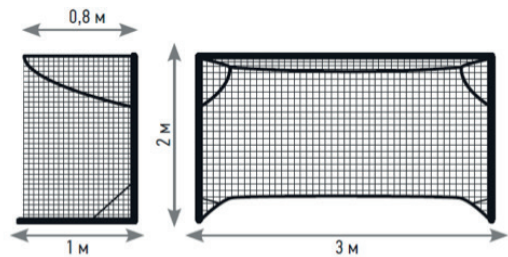

- Mesh size is not more than 100 mm;
- Thickness diameter is more than 2 mm
- Have a tension rope along the back for easy and safe installation.

Stocking Europe's largest range of nets sizes, Leon de Oro draws on over 40 years of experience in the industry.

Leon de Oro is at the forefront of net design and development, with new netting technologies constantly being introduced. We can cater to your custom netting requirements. Our extensive warehouse capabilities allow IMMEDIATE supply of large scale orders, with shipping available throughout worldwide.

Our 50mm high pvc webbing net tape with 4 rows of stitching and UV resistance give our nets a neat finish and long lasting durability.

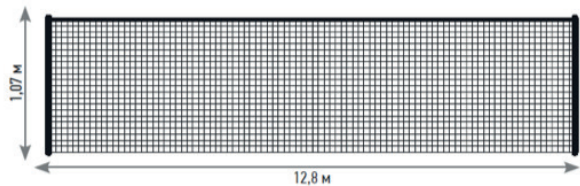

Our tennis and paddle nets meet all the requirements of the EN 1510 standard:

- Mesh size is less than 45 mm;
- The tensioner cable (less than 8 mm in diameter) should be inside top band of the net.
- Have a tension rope along the back for a better fixation of the net.

Basketball

A close-up, low-angle shot of a basketball hoop and its white net. The net is slightly swayed, and a basketball is visible in the lower right corner. The background is dark and out of focus, showing the structure of the arena.

Our basketball nets are used for the main international competitions like ACB , NBA y A1 Ethniki.

Our heavy-duty construction on Basketball nets makes strong enough for the outdoor game.

The swish of a net is one of the best sounds on the planet. Our nets are hand-tied and designed for indoor and outdoor play, with rigid loops at the top to prevent whipping. Built to handle the fiercest slams, it has a slightly stiff construction that softens up when you've earned the points.

Our basketball nets which contain "EN 1270" meet all the requirements of this standard: diameter from 4,5 mm and color white. All the basketball nets offer sufficient resistance to the passage of the balloon to delay the fall and to see whether it has passed through the net or not.

The nets of 12 hooks are sold in pairs and those of 8 and 6 are sold by units.

1992

Leon de Oro is a leading manufacturer of ultra-high quality hockey nets for inline and ice hockey facilities. We manufacture custom goal nets and protective netting for arenas, rinks and training facilities.

Hockey net is usually made using knotless nets, although we are able to use any type of net you would like. The best choice of nets for a hockey goal net is our PPHT . The Polypropylene net provides strength while also allowing fans the maximum visibility for its strength. Take a look at our choices, we can customize hockey nets to meet your needs and requirements.

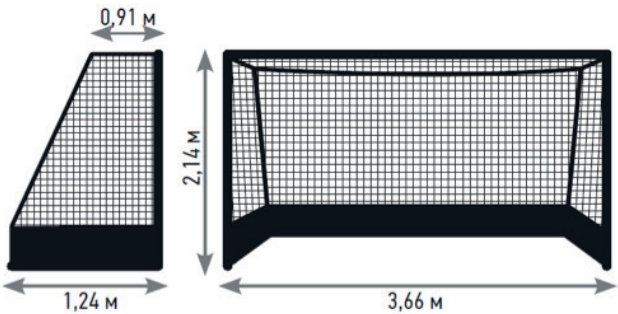

- Perfect for exterior as well as interior use as made of ultra-resistant materials to UV rays and atmospheric conditions;
- The material is water resistant and does not cause allergies.
- Available in several colours;
- Can be customized by size and shape.
- Sold in pairs.

Field Hockey

CLASSIC GOALS

3.66 length x 2.14 height
x 0.91 top depth x 1.24 bottom depth

Our Field Hockey netting meets all the requirements of the EN 750 standard:
- Mesh size is not more 35 mm.
- Sold in pairs.

Article	Description	Thickness	Material	Colour

goal nets
has become
a popular
requirement for
most pools over
60 countries.**

WORLD AQUATICS
CHAMPIONSHIPS

2019

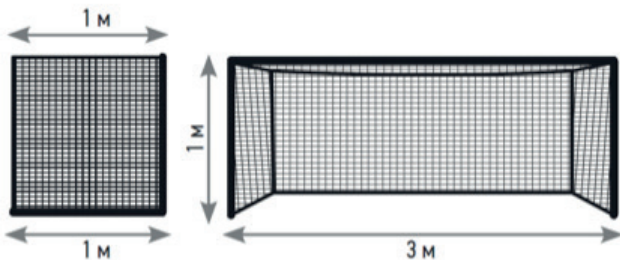

BARCELONA
OLYMPIC GAMES

1992

CLASSIC GOALS

3 m length x 1 m height x 1
m top depth x 1 m bottom
depth

Water polo presents a unique application problem. The acids and chlorine found in pools can eat up an average net in no time. That is why our specially treated water polo netting uses HTPP that is specifically manufactured to resist acid and chlorine for a longer goal life.

- The material doesn't absorb water and it floats;
- It does not cause allergies.
- It does not react with chlorine;
- Can be customized by size and shape;
- Mesh size: 100 mm;
- Sold in pairs;
- Our WATERPOLO netting meets all the requirements of FINA.

Up-folding dividing curtains

**Leon de Oro
manufacture
dividing nets/
curtains for
schools,
universities, leisure
centres and other
facilities over 60
countries.**

Up-folding dividing curtains aim to divide spaces in a sport hall. They provide a visual separation of two or more fields taking advantage of the lighting of the installation thanks to using of the net.

The curtain is made with net on the top and PVC tarpaulin on the bottom. It is available in flame retardant version, and is customized in terms of thickness, mesh, colour and measurements.

**Easy movement
of the net to
provide flexibility
with the use of
the space.**

Flame-retardant nets

**B1 Flame
retardant nets
suitable for
outdoor use.**

Leon de Oro FR nets are produced under B1 certification according to DIN 4102-1

Flame retardant nets are the ones that have retardation in the propagation and a rapid extinction of the flame. The grease of our PPHT is fireproofed before it's converted to the net. Therefore, the net does not lose its qualities, unlike the nets of other brands that obtain the flame-retardant treatment through the process of deep immerse.

Our flame-retardant nets are designed both for indoor and outdoor use where they do not lose their special property even after several years of use. Our flame-retardant nets are classified as M1 and B1 and have the corresponding certificates.

Nets for adventure parks

**We offer the
largest variety
of colours for
adventure parks.**

The theme parks are very popular in France, Italy and Germany. Our nets made from high tenacity polypropylene are ideal to maintain balance and to train coordination. They also serve as a safe protection against falls of people and materials. Our nets are 100% anti-allergic and can be used by the youngest children.

The nets with the thickness of 5 mm have certificates that give 100% safety guarantee with the proper installation. See the full range in the section *"PROTECTION NETS"*.

A person is shown from the back, wearing a dark athletic shirt, holding a discus with both hands. They are positioned in front of a safety net, which is slightly out of focus. The background is a muted blue-grey color.

Nets for discus & hammer cages

**Our nets meet
and/or exceed
NCAA and/or
IAAF rules.**

Discus Cage Nets comply with the standard DLV 190.3 and Hammer Cage Nets comply with the DLV 192.3.

According to the rules of competition of the International Association of Athletics Federations, the nets for disc and hammer cages are designed to stop a disc weighing 2 kg flying with a speed of up to 25 m/s and a hammer weighing 7.26 kg flying with a speed of up to 32 m/s.

Each disk/hammer cage net is equipped with three test meshes that have their own unique registration number so that after one year of use, the user could test the breaking force by sending a mesh to our laboratory. After testing, the user will receive a certificate from the manufacturer if the net is suitable for use for one year more.

A photograph of a baseball practice session inside a batting cage. A black safety net is in the foreground, creating a grid pattern. Behind the net, a batter in a maroon jersey is swinging a bat. A catcher in a dark jersey is crouched behind the batter, and a fielder in a green jersey is visible in the background. The scene is outdoors on a grassy field.

Knotless Ultra-high-molecular-weight polyethylene (UHMWPE) Netting

**Not only
is visibility
and loading
improved, is the
longest.**

MAJOR
LEAGUE
BASEBALL
(MLB)

MLS
TRAINING
FACILITIES.

MELBOURNE
BALLPARK

Our backstop nettings offer tough protection with near-perfect visibility with incredible strength-to-weight. We can design, engineer and build your custom nets for baseball or any kind of sport project.

UHMWPE is one of the strongest and lightest materials for netting in the world. Its strength to weight ratio is 8-15 times greater than steel.

- Knotless **UHMWPE** netting provides better audience visibility
- **UHMWPE** netting offers outstanding resistance to UV rays, sea water, abrasion and rupture with the very little thickness of the thread.
- Light weight offers cheaper transportation and easier installation.
- Available in different thicknesses and meshes.

Protection nets

**Leon de Oro
manufacture
custom solution
for almost any
netting problem.**

Leon de Oro provides the very best in custom backstop nets with over 40 years experience as manufacturer.

Protection nets for football fields, handball, tennis, paddle tennis, golf etc. They are designed to avoid the balls leaving sport area.

Protection systems for ski slopes

**We produce
custom Slope,
triangle and
barrier ski nets.**

Nowadays, safety requirements on ski slopes are regulated by the FIS (International Ski Federation). The main requirement is that the net must catch a skier who is going at a high speed.

However, as there are no standardized test procedures and European standards, our ski nets are tested in accordance with the French standard NF S 52-106. The minimum requirements for the energy absorption capacity of the nets are based on the EN 1263-1 standard for safety nets serving for catching people in case of fall on a building site.

NF S 52-106 regulates the production of ski nets:

- for rigid posts (S1);
- for flexible posts (S2).

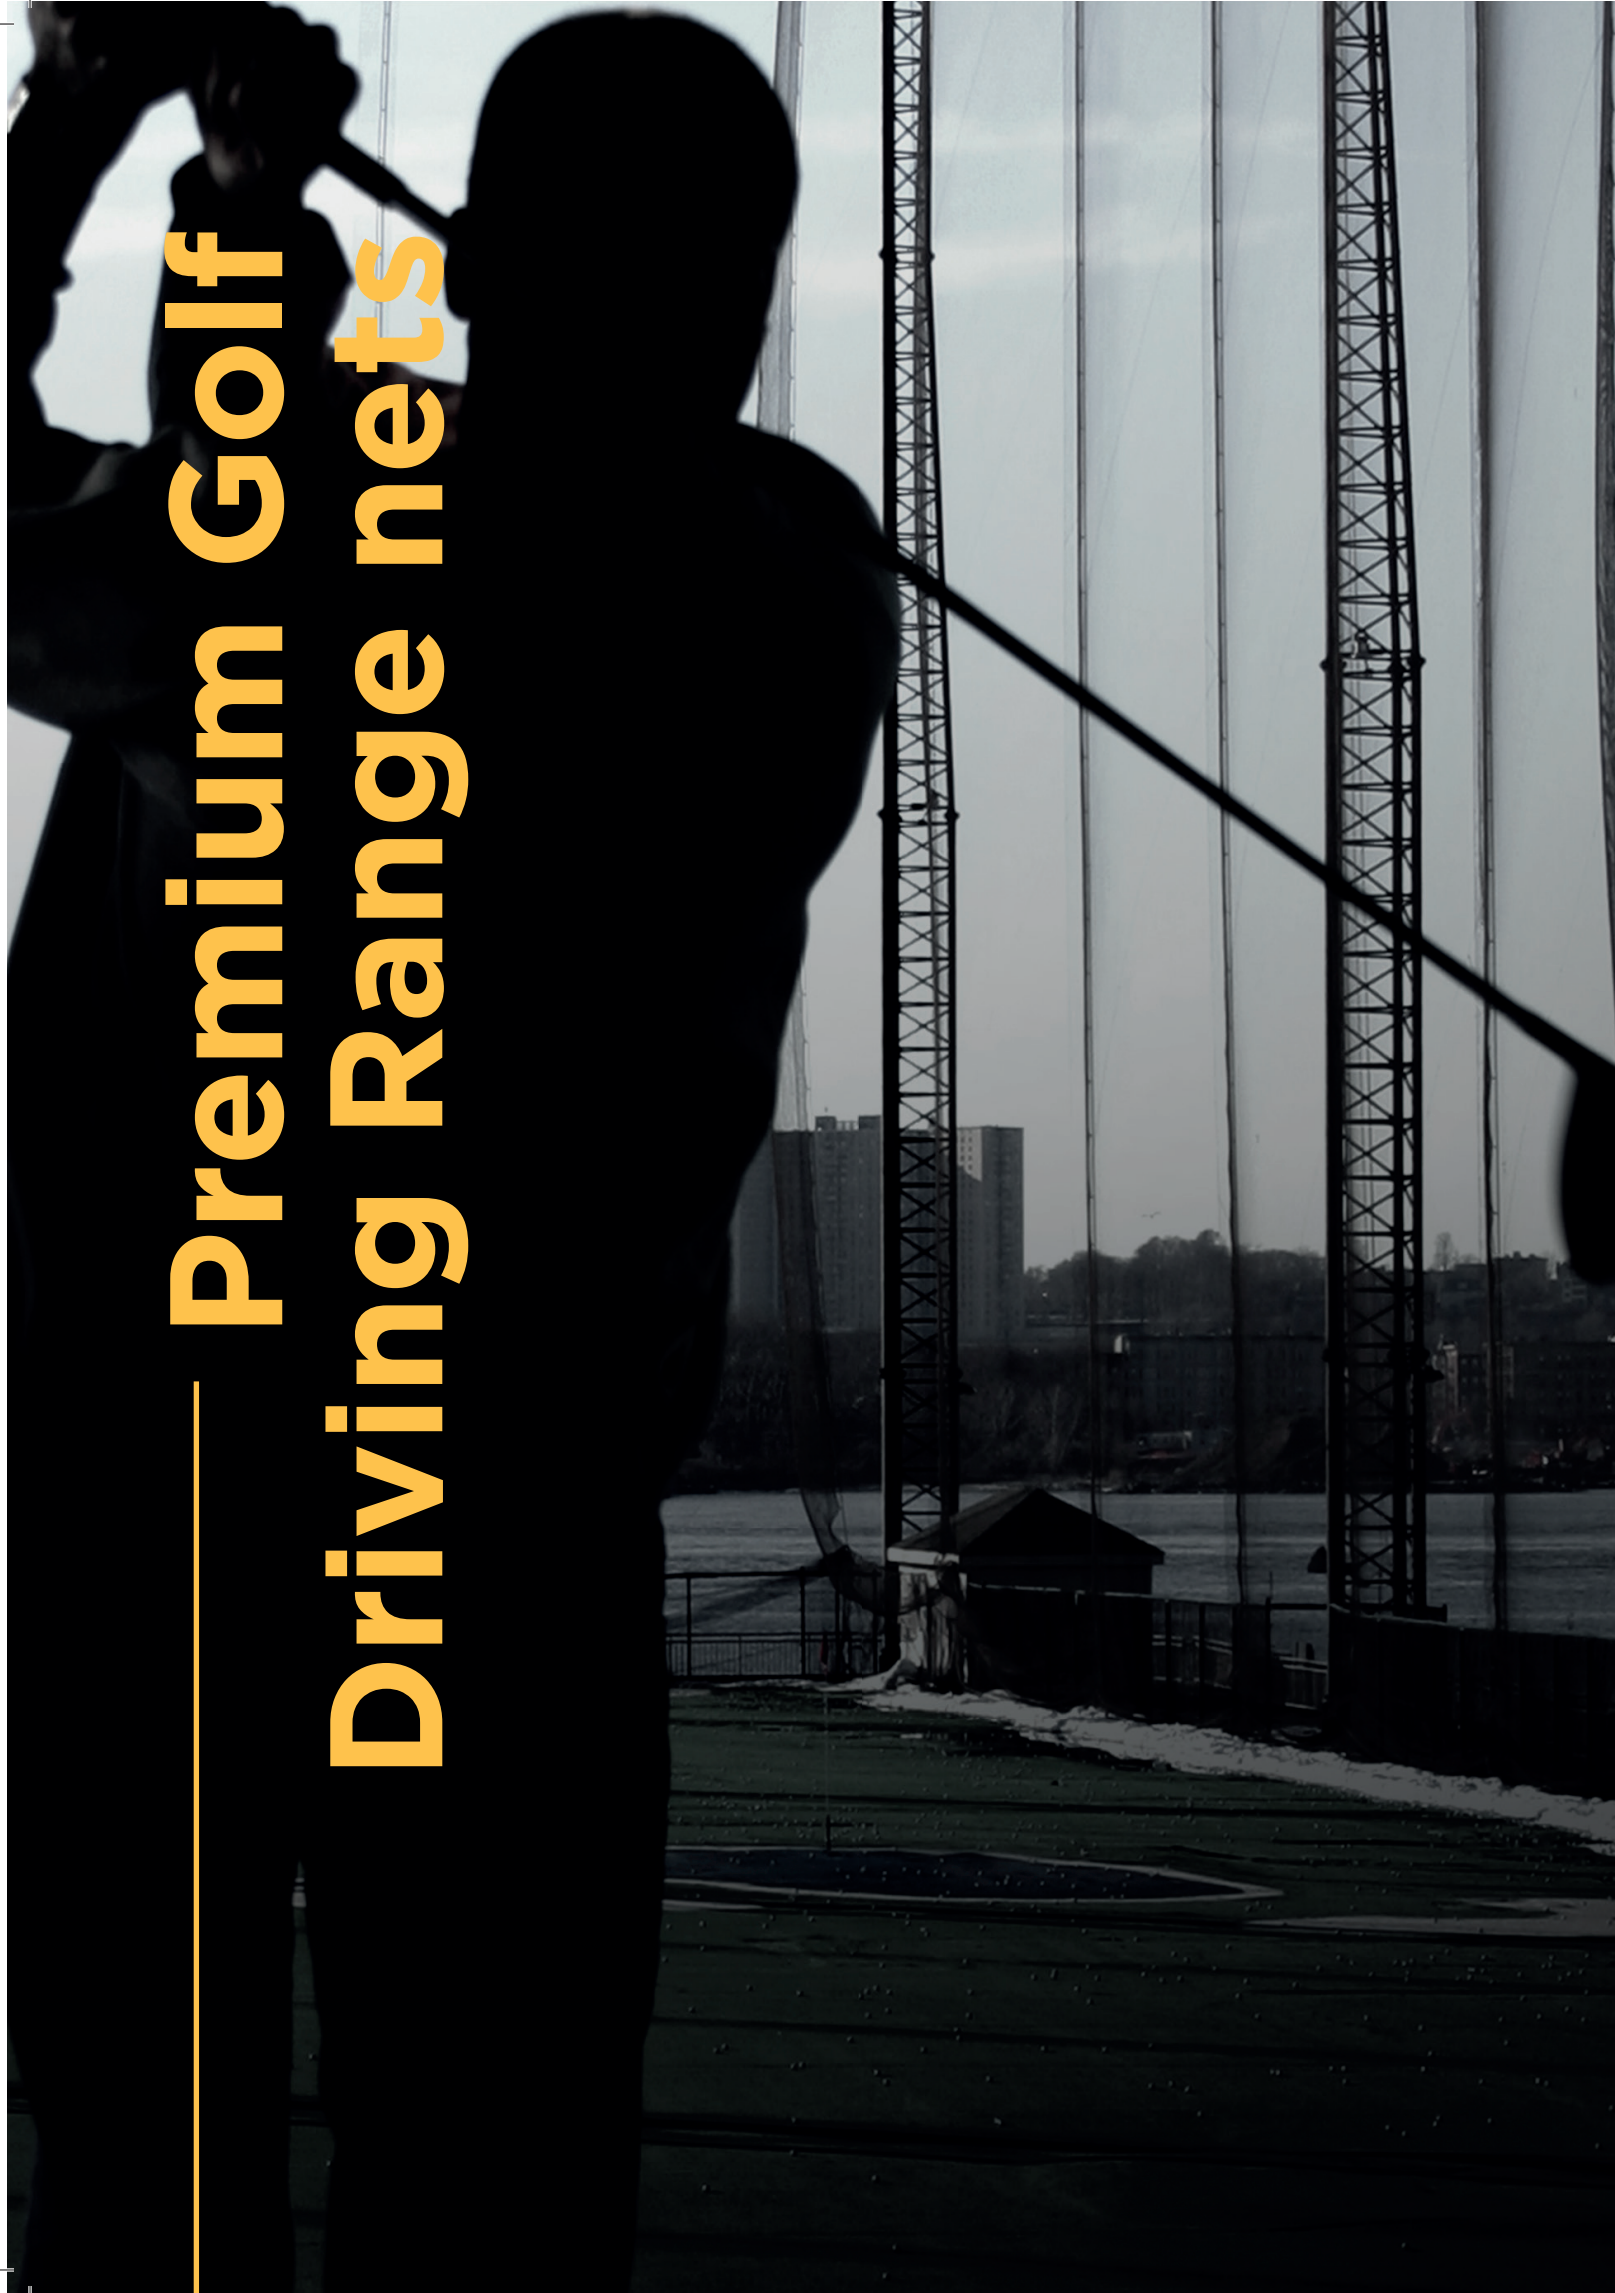

The minimum height of the protective nets S1 and S2 is 1.30 m.

Our nets for snow slopes characterized by the highest quality and durability meet all the necessary safety requirements.

Premium Golf Driving Range nets

Our strongest and most durable driving range netting is manufactured from our knotless Nylon configuration with exclusive autoclave treatment. Tested to NFPA 701:2019 Method 1.

Considered by many as the best driving range nets on the market, our nets are manufactured with 20mm mesh squares and specifically designed to stop all golf balls in their tracks, in turn protecting both spectators and the surrounding area from any potential golf ball related damage with ultra-durable heat-sealed edges.

Suitable for indoor and outdoor usage, this black golf net is rot resistant and UV treated.

These hard-wearing features work together to allow continuous exposure to intense sunlight, aiding to the life of the product.

- Diameter: 2mm
- Mesh: 20 x 20mm
- MFG warranty* (Manufacturer's warranty)
- Colour: Black
- Breaking force: 115kg
- Double UV protection.
- Sizes: Any custom or standard sizes.

Ropes & accessories

El Leon de Oro offers a wide variety of installation accessories. In this catalog you'll find the most frequent accessories. For all other accessories, consult your personal manager.

ROPE 30 KN

Material: PaHT
Diameter: 14 mm
Minimum resistance: 30 kN.
Article: 700210000000
Roll: 100 ml

ROPE 30 KN

Material: PPHT
Diameter: 12 mm
Configuration: twisted
Minimum resistance: 20 kN
Article: 70421020000
• Roll: 100 ml
• Roll: 100 ml
Configuration: braided
Article: 70421020012

ROPE 15 KN

Objective: to attach the safety net to the structure (double branch).
Material: PPHT
Diameter: 10 mm
Minimum resistance: 15 kN.
Roll: 100 ml.
Configuration: braided
Article: 70425000114
Configuration: twisted
Article: 70425000000

RAFFIA ROPE 15 KN

It is used in twofold position for mounting the nets of System S. NB: this rope is not certified.
Material: PPHT raffia
Diameter: 10 mm
Breaking force: 15 kN
Articles:
Orange: 70428000100
White: 70428000101
Blue: 70428000103
Roll: 220 ml. MOQ: 108 roll/pallet

ELASTIC ROPE

Material: Rubber latex inside and high tenacity polyester shirt.
Articles:
6 mm white: 70016000200
8 mm white: 70018000200
8 mm blue: 70418000203
Roll: 200 ml

ROPE 14 MM EN 795

Material: PaHT
Diameter: 14 mm
Configuration: braided
Breaking force: 40 kN
Article: 70421400002
Roll: 100 ml
Features:
The rope serves for horizontal and vertical lifelines and complies with all the requirements of EN 795.

**SEMISTATIC ROPE EN 1891
"GOLDEN ROPE" 30 KN**

Material: PaHT
Type A
Breaking force: 30 kN
Diameter: 10.5 mm
Configuration: braided
with / without suit
Certificate: EC-Type
Article: 70011100000
Roll: 100 ml

**LEAD ROPE**

Material: Lead rope with
PP shirt
Diameter: 10 mm
Configuration: braided
**200 g/m white:
91912000099**
**400 g/m black:
91914000098**
**400 g/m white:
91914000099**

**ROPE 5 MM**

Material: PP
Diameter: 5 mm
Configuration: braided
Yellow: 70418000006
White: 70418000000
Green: 70418000002
Red: 70418000004
Black: 70418000001
Blue: 70418000003
Roll: 220 ml

**ROPE 6 MM PA**

Material: PaHT
Diameter: 6 mm
Configuration: braided
Colour: white
Article: 70016000100
Roll: 100 ml

**ROPE 8 MM**

Material: PP
Diameter: 8 mm
Configuration: braided
Green: 97418000002
**White with spots:
70218010000**
White: 70428000000
Roll: 100 ml

**ROPE 10 MM**

Material: PPHT
Diameter: 10 mm
Configuration: braided
**White/Green:
70419000032**
**White/Red:
70419000034**
Roll: 100 ml

**ROPE 14 MM**

Material: PST
Diameter: 14 mm
Configuration: cabled
White: 70421400001
Black: 95001200001
Roll: 100 ml

**CARABINER 25 KN**

*Objective: to attach the
net to the structure or
cable*
Article: 95808080000

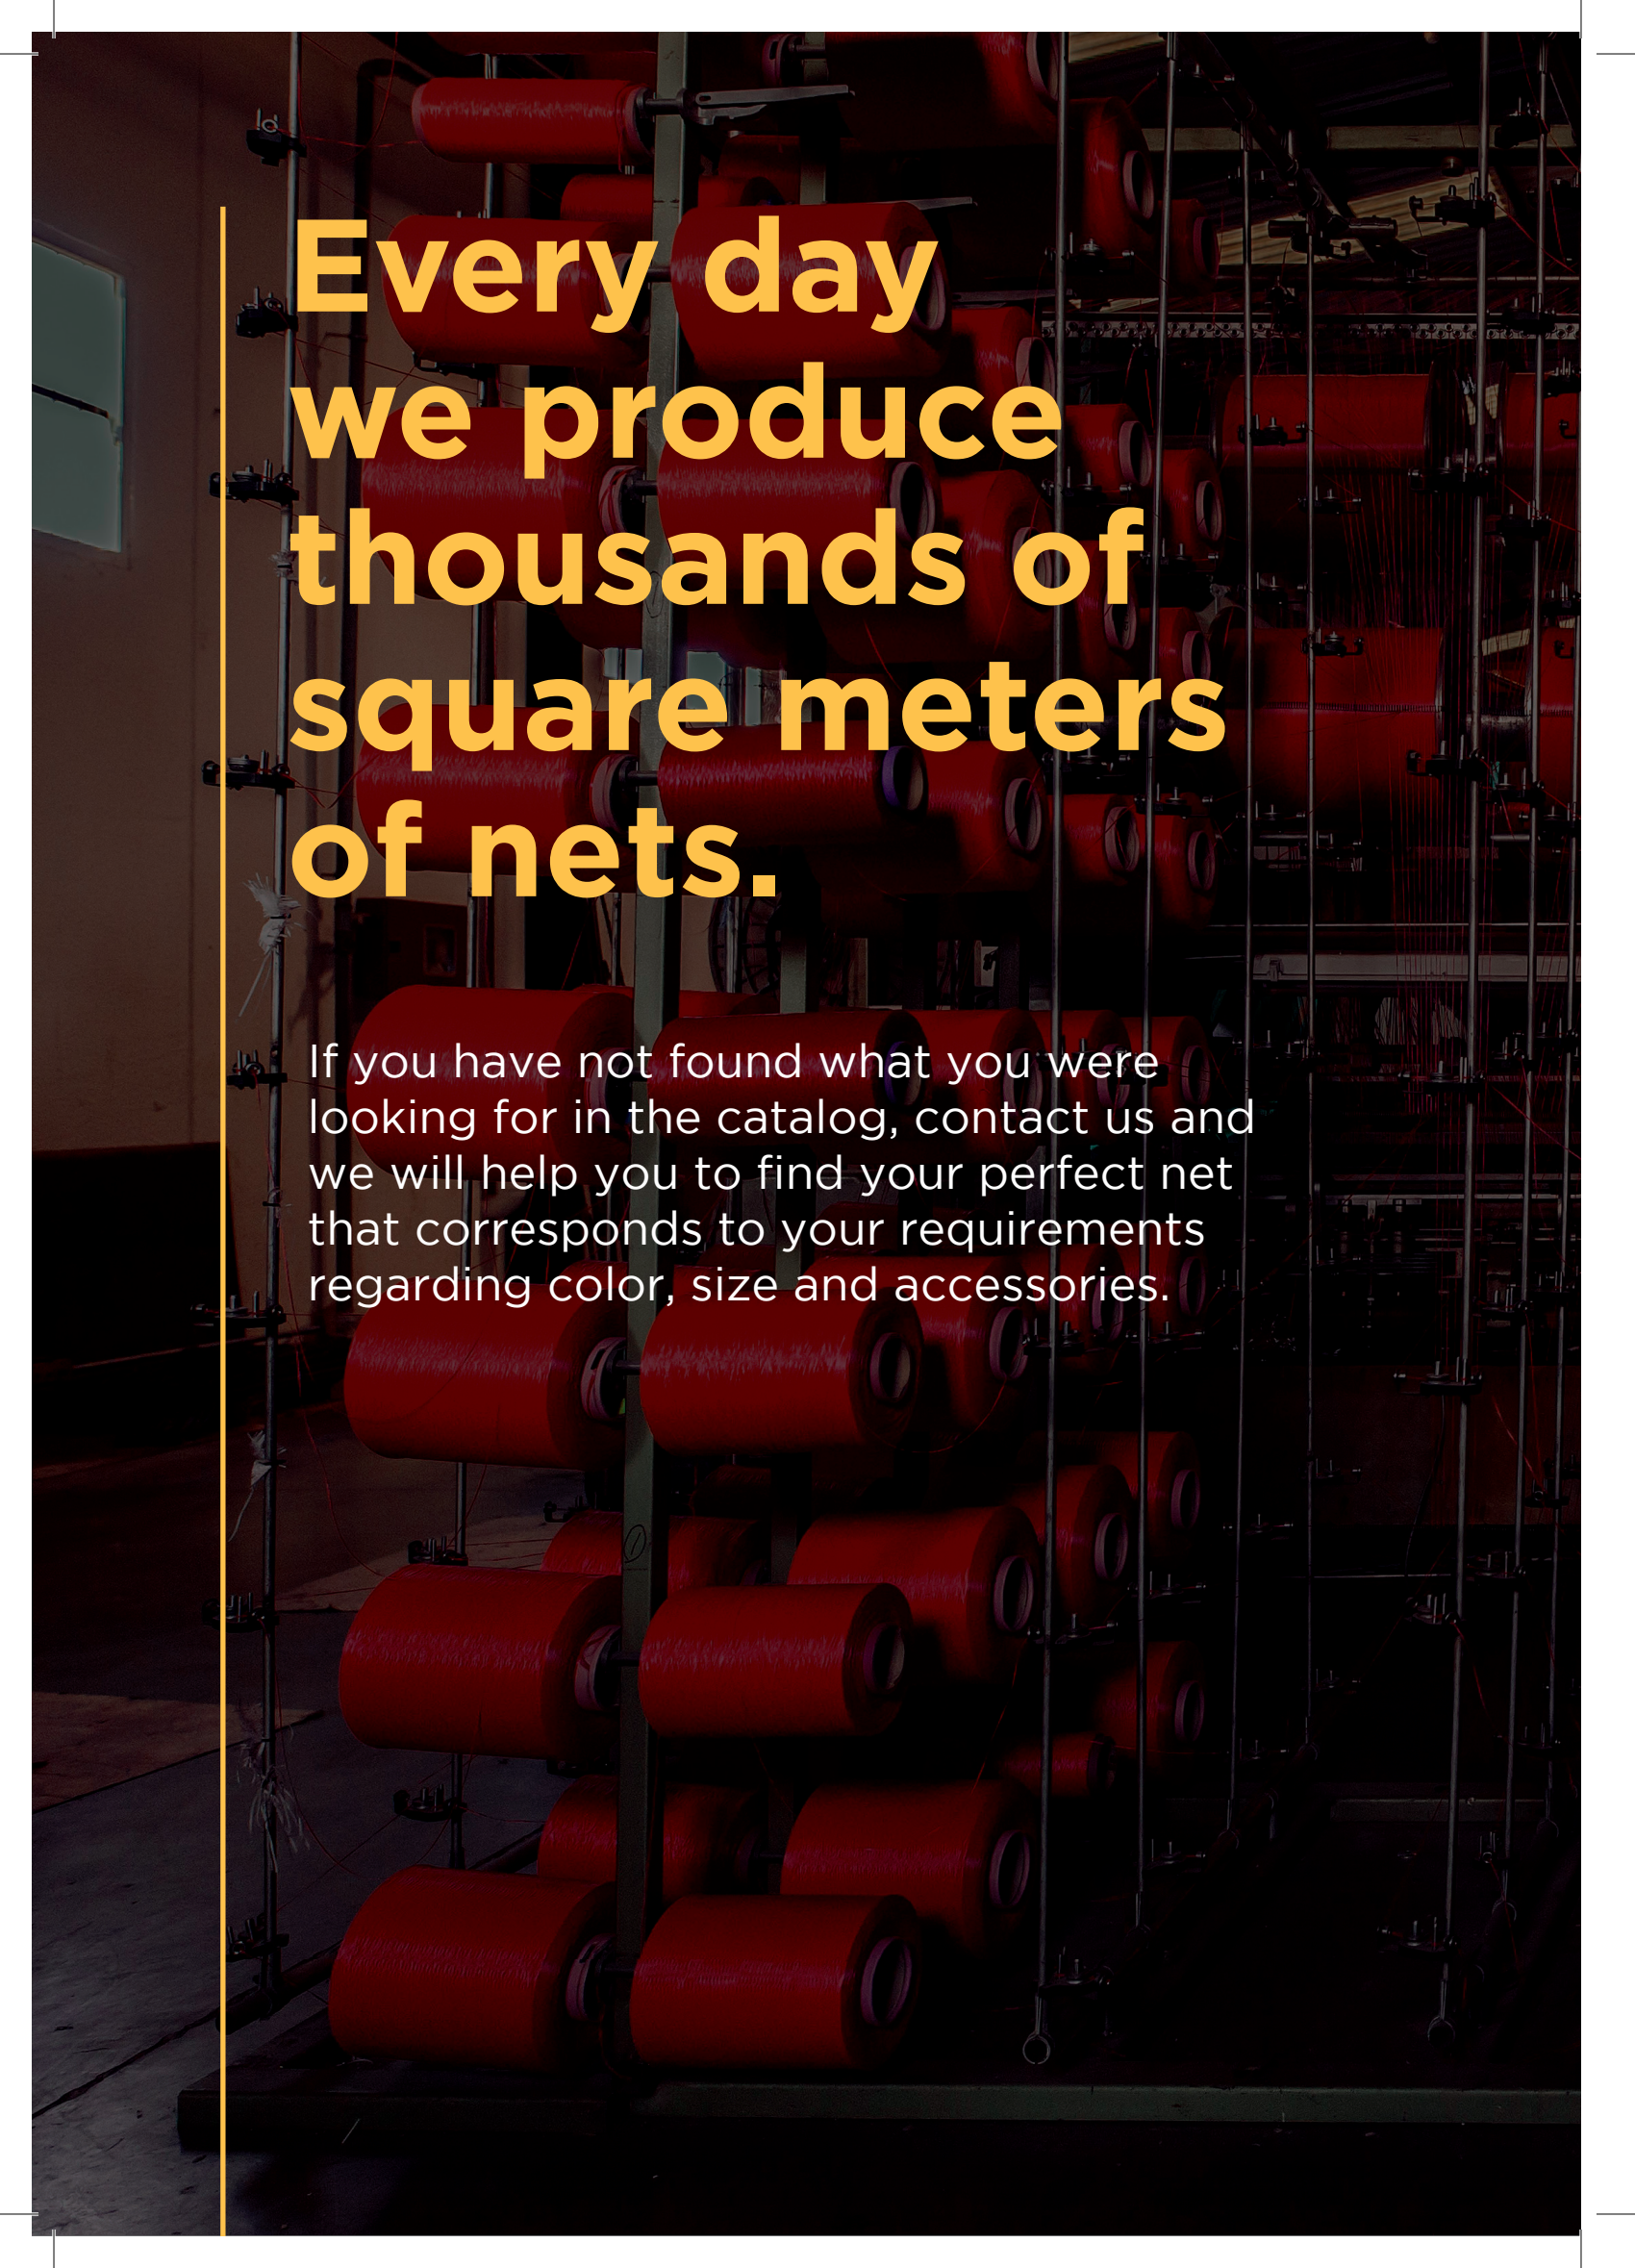

Hemp climbing rope

Hemp climbing rope is the most resistant to friction between all materials. It is not convenient to use it outdoors because being a natural fiber, water can damage it.
The rope can be customized.

Article	Description	Thickness	Length
41992600400	Hemp rope with a thimble on one end	26 mm	4 m
41992601400	Hemp rope with climbing knots	26 mm	4 m

**Every day
we produce
thousands of
square meters
of nets.**

If you have not found what you were looking for in the catalog, contact us and we will help you to find your perfect net that corresponds to your requirements regarding color, size and accessories.
